# MESSAGE OF THE REGIONAL DIRECTOR

To give what is due and perform at one's best have always been the rallying call of the whole workforce of the Department of the Interior and Local Government Region 1. This has driven us to achieve our targets and accomplish our deliverables.

2015 is indeed a good year for us. Through the commitment and relentless efforts of our personnel to perform their functions, we have been recognized as one of the Best Regional Offices for CY 2014.

But trite as it may sound, giving our best is something we owe not to ourselves but for our community which has entrusted us with duties to do good and shape the way things are done in the local government units (LGUs).

Nonetheless, we acknowledge that apart from the solid partnerships formed with the local officials and functionaries of these LGUs, we could only go as far in implementing the programs, projects, and activities (PPAs) of the Department. We are grateful because our LGUs have opened more doors for us to influence the state of local governance.

We thank our civil society organizations (CSOs) which have played major roles in our priority PPAs particularly in the Bottom- Up Budgeting (BuB). We extend the same gratitude to the different National Government Agencies (NGAs), local resource institutes (LRIs), and other stakeholders which valued convergence as means of delivering basic services to our community.

Above all, we thank our Top Management, bureaus, services, and the Local Government Academy (LGA) for guiding and enabling us to strengthen local government capacities.

We continue to count on your support so we can scale new heights and make 2016 another year of remarkable accomplishments.

  
JULIE J. DAQUIOAG, Ph.D., CESO IV  
REGIONAL DIRECTOR

# MESSAGE OF THE OIC- ASST. REGIONAL DIRECTOR

As you browse through the pages of this Annual Report, the reason why it is one of the best time to be part of the Department will be apparent.

Moving towards the 25th Anniversary of the Local Government Code of 1991, we reap the fruits of the long- drawn- out capacity development initiatives and assistance we have given local government units (LGUs) as evidenced by the number of Seal of Good Local Governance (SGLG) awardees we have in the Region. With great pride, we have the most number of LGUs awarded with the much coveted Seal.

Aside from seeing LGUs develop their capacities, we also take part in realizing the essence of participatory governance through our active involvement in the implementation of Bottom-Up budgeting.

We also take the lead in advocating disaster preparedness and resiliency through the Department's Operation Listo. We exert all efforts to ensure LGU compliance to relevant laws and regulations and help LGUs achieve sustainable local development.

For every stride we make and assistance we provide, our progress and its impact to the community will only be possible through the support of our stakeholders- local officials and functionaries, other government agencies, civil society organizations, academe, Top Management, bureaus, services, and other attached agencies of the Department. We humbly thank you for your confidence in us.

May God continue to bless our work.

# Ugnayan ng Barangay at Simbahan

The Ugnayan ng Barangay at Simbahan (UBAS) program is one of the noble partnerships formed in response to the call of the late Secretary Jesse M. Robredo for faith-based groups to take part in joint undertakings with the government for the delivery of basic services to the people. In support to the national implementation of the UBAS, the DILG R1 has enjoined LGUs within its jurisdiction to issue Executive Orders creating the Provincial Convenor's Group and Technical Working Group, City / Municipal Convenor's and Technical Working Group and Barangay Action Teams (BATs).

At present, all four (4) provinces in the Region have organized their respective Provincial Convenor's Group and Technical Working Group.

All 125 LGUs also have their City / Municipal Convenor's Group and Technical Working Group.

All the 3,265 barangays in the region have organized their Barangay Action Teams (BATs).

# Barangay Governance Performance Management System

All of the 3,265 barangays in the Region were provided with Technical Assistance in the data gathering component of the Barangay Governance Performance Management System (BGPMS) and in the preparation of their respective State of Barangay Governance Report (SBGR).

As a result, all of the 3,265 barangays in the Region have submitted their respective SBGRs.

The BGPMS is an assessment tool for barangays that measures the effective delivery of services and accomplishments in the performance of their function as mandated in the 1991 Local Government Code and other related issuances.

It provides a clear picture of the performance and productivity level of barangays in the areas of Governance, Administration, Social Services, Economic Development and Environmental Management.

The said measurement/evaluation instrument will identify and determine the presence and absence of: (a) barangay compliance to laws and presidential directives; (b) facilities and equipment; (c) managerial and administrative capacities of barangay officials; and (d) programs and project being implemented and thereby also reflecting the barangays' capacity and limitations in the five (5) performance areas.

It shall also serve as guide for the higher local government units, the national government and other service providers to determine the kind of policy and program intervention the barangay needs.

# Potable Water Supply

## BALUNGAO, PANGASINAN

*The Provision of Potable Water Supply (PWS) Level II in Balungao, Pangasinan is the only PWS project with windmill in Region 1 under the 2014 Bottom- Up Budgeting (BuB). The project- Installation of One (1) Unit Deep Well with Windmill and Rehabilitation of two (2) Units Deep Well with Windmill is currently benefitting 223 families of Purok 1 and Purok IV of Barangay San Andres and Purok 1 of Barangay Mabini, Balungao, Pangasinan.*

*Prior to the completion of said projects, residents have no choice but to fetch water at open wells which is more than 250 meters away from their home, over a rolling terrain which is muddy during rainy season and dustier than dusty in summer. This resulted to many cases of diarrhea especially among children. This problem of no access to potable water is a perennial problem that the people of Mabini and San Andres want to be immediately addressed.*

*Upon the completion of the BuB- PWS in the LGU, these poor families now have access to potable drinking water which will improve their health and sanitation condition.*
